EDUCATION

Chandigarh University

Bachelor of Engineering in Computer Science

Mohali, Punjab

Aug 2023 – Aug 2027

Nirmala Convent Inter College

Senior Secondary Examination XII (ICSE)

Lucknow, UP

2020 – 2022

TECHNICAL SKILLS

- **Core Stack:** MERN (MongoDB, Express.js, React.js, Node.js), RESTful APIs, MVC Architecture
- **Programming Languages:** JavaScript (ES6+), C++, Java, Python
- **Frontend Development:** HTML5, CSS3, Bootstrap, Tailwind CSS, Responsive Design, EJS, Cross-Browser Compatibility
- **Backend Development:** Node.js, Express.js, JWT Authentication, API Integration, Multer, Web Performance Optimization
- **Databases:** MySQL, PostgreSQL, SQL, NoSQL, Database Indexing & Optimization, CRUD Operations
- **Tools & Version Control:** Git, GitHub, Postman, npm, Chart.js, Lighthouse, VS Code
- **Computer Science:** Data Structures, Algorithms, Object-Oriented Programming (OOP), DBMS

PROJECTS

AlgoVisual — [Source](#)

Jan 2026 – Mar 2026

React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Framer Motion, JWT

- Built a production-ready MERN stack DSA visualizer deployed on Vercel with full JWT-based authentication.
- Implemented Sorting and Searching visualizers (Bubble, Selection, Insertion) with real-time speed and array-size controls.
- Developed interactive Graph visualizer supporting BFS/DFS traversals with dynamic node creation via drag-and-drop.
- Created a grid-based Pathfinding visualizer with wall-building capability and animated BFS shortest-path highlighting.
- Integrated Monaco Editor Code Playground supporting multi-language execution simulation for JS, Python, C++, and Java.

Task Management System — [Source](#)

Oct 2025 – Dec 2025

React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Redux Toolkit, JWT

- Developed a robust task collaboration workspace featuring secure multi-tenant user authentication via JWT.
- Engineered an interactive Kanban board dashboard allowing drag-and-drop task status transitions and automated tracking.
- Built comprehensive task distribution logic supporting nested sub-tasks, attachments using Multer, and user workload distribution.
- Integrated real-time performance analytics using Chart.js to visualize task completion rates and team productivity trends.
- Constructed optimized RESTful API endpoints with Express and MongoDB, applying strict validation and query indexing.

MERN E-Commerce Store — [Source](#)

Jan 2025 – Mar 2025

React.js, Node.js, Express.js, MongoDB, Bootstrap, JWT, REST APIs

- Built a full-stack e-commerce platform with user authentication, dynamic product listings, and persistent shopping cart.
- Implemented JWT-based login/registration with role-based access control (RBAC) separating admin and customer privileges.
- Developed a feature-rich admin dashboard supporting product management, order tracking, and inventory control.
- Engineered a secure checkout flow with order lifecycle management and real-time cart state synchronization.

CERTIFICATIONS

- **Spring and Angular Full Stack Developer** – Infosys 2024
- **Microsoft Office using AI Tools Workshop** – be10x 2024
- **Technology Virtual Experience Program** – Deloitte 2024

ACHIEVEMENTS

- **Hackathon Finalist:** Reached the final round of the Zinnovatio Hackathon competing among 200+ teams university-wide.
- **Competitive Programming:** Solved 500+ problems across LeetCode, GeeksforGeeks, and CodeStudio covering Arrays, DP, and Graphs.
- **Academic Performance:** Consistently maintaining strong academic standing in B.E. Computer Science.
